

# Checklist for Streaming

1. Power up the systems
2. Check Internet connection
3. Open Streaming Software (vMix, OBS(YellowDuck), Sam Broadcaster)
4. Login to all the platforms to get the Stream Url and streamkey (Facebook, YouTube, Instagram, Twitter, LinkedIn, Live.daystarng.org, Daystar Radio)  
**(FIND PECULIARITY OF EACH BELOW)**
5. Get Service elements e.g. Countdown, Junior Church, Message and load them to the streaming software (**Note: If its playback message, we will use our copy of the message rather than the one played in the church - THIS IS STATUTORY**)
6. Change the **title** of the service on all platform to reflect the **current date** and/or **the event**.
7. In case of any issue that you think you cannot resolve or if you are in doubt **ASK FOR CLARIFICATION.**

## Steps for Each of the Platform

- Open vMix
  - Load Daystar 2022 Settings
  - Open the Streaming settings for the 3 streaming Channels
  - Channel 1 – Live.daystarng.org this also stream to Twitter, Facebook, Tiktok
  - Channel 2 – YouTube
  - Channel 3 – LinkedIn
- i) YouTube – From YouTube Studio change the title and date of the service, if the stream doesn't come up on YouTube Studio, generate a new streamkey, update it on Channel 2 and save the settings so that we won't have to do the same at next service
  - ii) LinkedIn – go to <https://www.linkedin.com/video/golive>, Choose Region – Europe West, Click on Get Url, this will generate stream parameters. Copy the streamurl and streamkey to channel 3 on vMix, Start the Stream, go back to the above linkedinurl and Click on Go Live
  - iii) Instagram – Login to Yellow Duck to get the streamurl and streamkey, copy the streamurl and streamkey to OBS, Start the stream, Go back to YellowDuck, Click on Start Broadcast
  - iv) Facebook – login to wowza on <http://3.11.196.183:8088>, Go to live, Click on Stream Target, Edit the Facebook Stream Target, Change the Title and the date of the service.

- v) Twitter – Login to [studio.twitter.com](https://studio.twitter.com) – Click on Producer, Click on Live, Click on Create Broadcast, Insert the Title and date of the service, select the category of Lifestyle and Wellness, Select the first vMix under source, confirm that the stream is on the source, Click on Create Broadcast, Click on Tweet, Copy the title and date in the tweet title section, click on Tweet. Go to [twitter.com](https://twitter.com), go to [daystarng](#) page and Pin the broadcast.
- vi) Daystar Radio – Open NDI Virtual Input, right click on it on the taskbar, select vmix output, Open Sam Broadcaster, click on the dropdown on the broadcast, select Source, from the dropdown select Line NewTek
